

New York City's Coney Island Hospital Leverages NOA's Expertise on the QuadraMed® (QCPR®) System

August 2009: Negley, Ott & Associates, Inc.'s consultant Brenda Rollins, recently conducted a consulting engagement at **Coney Island Hospital**, New York City, NY, in order to provide technical configuration training on the **QuadraMed Corporation® (QCPR®)** system. The training offered by NOA covered a procedure centered database course involving configuration of the procedure related dictionaries/tables. This was an introductory course offered by NOA designed to achieve knowledge transfer on best-demonstrated-practices which enables clients to achieve a greater return-on-investment for the CPR software using organic tools that comes with the system.

Congratulations to **NYCHHC and CIH** for yet another accomplishment that demonstrates quality and excellence towards community health by using the **QuadraMed Corporation® (QCPR®)** integrated electronic health record.

About Negley, Ott & Associates, Inc.

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with best demonstrated practices in conjunction with implementing clinical software systems that focus on patient care. The issues, personalities, opportunities, challenges and solutions required by clinical system implementations require the ability to meld sensitivity to clinical processes with the realities of computing and patient care delivery. To date, NOA has provided services to over 70 hospitals installing clinical systems using an approach that stresses both outcomes and knowledge transfer. Supporting so many users, both during and after their installation, gives NOA the opportunity to understand the issues that make clinical systems work, and those that don't.

To contact us regarding NOA's assistance with this or any other service, please see our [CONTACT US](#) page.
