

NEGLEY, OTT & ASSOCIATES, INC.

August 2010 – Savannah, GA - NEGLEY, OTT & ASSOCIATES, INC has recently adopted a new organizational model to promote their mission.

Since its founding in 1992, NOA has been dedicated to delivering quality outcomes and customer satisfaction in the clinical computing space. The original founders of the company established a high standard of excellence and satisfaction that hospitals value when they look to NOA for solutions. Over the years the client base has grown and so has NOA. While NOA has grown beyond what was originally a small family business, we still ensure that our customers continue to receive the same satisfaction level with the personal touch associated with our original vision.

In July 2010, NOA's partners Cary Negley and Rod Walker saw a need to position the company to meet the growing and changing needs of the market we serve. To this end, three of NOA's talented consultants have been promoted to the position of "Director, Consulting Services". NOA believes that this move will further the continuing success the company has demonstrated through quality service and customer satisfaction. These roles will focus on account management and ensuring that clients have immediate access to a senior resource in the company.

It is with great pleasure that NOA announces the following promotions:

Donna Welsh, R.T. has been with NOA for ten years as a managing consultant. Donna achieved certification on both the QuadraMed-CPR/CPOE system and the Eclipsys SCM system. Prior to joining the ranks of NOA, Donna had many years in healthcare at a client site that deployed the QCPR product. In addition to performing instruction and application training to end users on EMR systems, Donna also provides project management of EMR initiatives.

Jeanie Eckmann, M.T. (ASCP) has been with NOA for ten years as a managing consultant. Since joining NOA, Jeanie has successfully supported deployment of both QuadraMed's QCPR system as well as the Eclipsys SCM system at multiple customer sites. She is certified on the Eclipsys-SCM system. Prior to joining NOA, Jeanie had several years experience on the QCPR product at both the vendor level and at a client site that deployed that system. She also served as an instructor of both end user applications and configuration on EMR products for customers using the QuadraMed-CPR/CPOE system and the Eclipsys SCM system.

Herb Walls has been a clinical systems consultant and programmer with a focus on technical solutions for NOA since 2008. Herb's QCPR product expertise is built upon his technical background, a Bachelor of Science degree in Information Technology/Software Engineering, as well as his patient care experience in cardiology and emergency medicine. He specializes in technical solutions in the deployment of EMR systems such as QuadraMed-

CPR/CPOE and Eclipsys SCM, while leveraging his clinical experience in a healthcare setting. He also serves as a technical resource for other NOA consultants in system analysis and implementation.

Congratulations to the new directors!

About Negley, Ott & Associates, Inc.

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with best demonstrated practices in conjunction with implementing clinical software systems that focus on patient care. The issues, personalities, opportunities, challenges and solutions required by clinical system implementations require the ability to meld sensitivity to clinical processes with the realities of computing and patient care delivery. To date, NOA has provided services to over 60 hospitals installing clinical systems using an approach that stresses both outcomes and knowledge transfer. Supporting so many users, both during and after their installation, gives NOA the opportunity to understand the issues that make clinical systems work, and those that don't.
