

NEGLEY, OTT & ASSOCIATES, INC.

July 2010 – Coney Island Hospital, Brooklyn, NY - NEGLEY, OTT & ASSOCIATES, INC engaged to conduct Cache testing. In July 2010, NOA's consultants, Stacie Barrow and Pelvia Woods, RN began a new project for creating test scripts and to validate the Cache operating system for QCPR at **Coney Island Hospital**.

This project initiative represents a continued engagement of NOA for expertise and best-demonstrated practices via the Quadramed-CPR™/ CPOE™ system at **Coney Island Hospital**. The NOA consultants on this project will work closely with the IT leadership and project team from the hospital in order to design and conduct detailed testing activities for validating the new Cache operating system relative to QCPR application features. The scope of the validation will address the following within QCPR:

- Applications features
- DED (data element dependencies)
- CE (criteria engine)
- Interfaces
- Reports
- Reporting issues
- Tracking issue resolution

Coney Island Hospital is one of the multiple facilities of the **New York City Health and Hospitals Corporation (NYCHHC)**.

Congratulations to **Coney Island Hospital** and NOA's clinical consulting team for continued successes in deploying best-demonstrated practices with the Quadramed-CPR™/ CPOE™ system.

About Negley, Ott & Associates, Inc.

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with best demonstrated practices in conjunction with implementing clinical software systems that focus on patient care. The issues, personalities, opportunities, challenges and solutions required by clinical system implementations require the ability to meld sensitivity to clinical processes with the realities of computing and patient care delivery. To date, NOA has provided services to over 60 hospitals installing clinical systems using an approach that stresses both outcomes and knowledge transfer. Supporting so many users, both during and after their installation, gives NOA the opportunity to understand the issues that make clinical systems work, and those that don't.

To contact us regarding NOA's assistance with this or any other service, please see our [CONTACT US](#) page.
