

NEGLEY, OTT & ASSOCIATES, INC.

September 2010 – Savannah, GA - NEGLEY, OTT & ASSOCIATES, INC provides staff augmentation support for Meaningful Use problem list project...

In September 2010 Forrest General Hospital leveraged NOA's "just-in-time resources" to provide project team staff augmentation support. This project involved providing assistance and support for updating the Problem List related tables needed by FGH for a database roll in order to deploy a problem list pilot initiative with release level QuadraMed Computerized-Patient Record (QCPR) 5.1.1. Forrest General's IT staff and NOA collaborated on the project to ensure that it was completed in a timely manner in order to address the deadlines associated with achieving Meaningful Use. As a beta site for QCPR, Forrest General Hospital is at the forefront of the latest HIT trends as it prepares to meet Meaningful Use Stage 1 Criteria under ARRA.

About Negley, Ott & Associates, Inc.

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with best demonstrated practices in conjunction with implementing clinical software systems that focus on patient care. The issues, personalities, opportunities, challenges and solutions required by clinical system implementations require the ability to meld sensitivity to clinical processes with the realities of computing and patient care delivery. NOA provides a full range of clinical systems deployment support including initiatives for achieving **Meaningful Use**.

To date, NOA has provided services to more than 70 hospitals installing clinical systems using an approach that stresses both outcomes and knowledge transfer. Supporting so many users, both during and after their installation, gives NOA the opportunity to understand the issues that make clinical systems work, and those that don't.
