

February 2011 - NEGLEY, OTT & ASSOCIATES, INC Helps Forrest General Hospital Deploy Problem List Functionality for Meaningful Use with QuadraMed's EHR Solution

February 2011: **Forrest General Hospital** leveraged NOA's Lewis McMaster, RN, and Kevin Rogers, RN, to support design, configuration and deployment of customized clinical desktops and problem list selection screens on the QuadraMed® Computerized-Patient Record (QCPR) System in order to support compliance with ARRA regulations (aka: Meaningful Use).

NOA is engaged to support implementing the problem list with targeted groups of physicians at Forrest General Hospital encompassing both inpatient and emergency room populations. In addition, NOA is also training physicians on the best demonstrated practices for using the problem list features and associated selection screens in order to meet meaningful use requirements.

About Negley, Ott & Associates, Inc.

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with best demonstrated practices in conjunction with implementing clinical software systems that focus on patient care. The issues, personalities, opportunities, challenges and solutions required by clinical system implementations require the ability to meld sensitivity to clinical processes with the realities of computing and patient care delivery. To date, NOA has provided services to over 60 hospitals installing clinical systems using an approach that stresses both outcomes and knowledge transfer. Supporting so many users, both during and after their installation, gives NOA the opportunity to understand the issues that make clinical systems work, and those that don't.
