

“No job is too small”

NOA is a privately owned consulting firm with expertise on the Quadramed-CPR/CPOE system. We are committed to a collaborative approach for delivering consultative support on your CPR initiatives by coordinating our efforts with all project personnel. Our clinical consulting practice with the Quadramed-CPR/CPOE solution suite involves a best demonstrated practices approach to delivering solutions for your organization consisting of the following: CPR Strategic Planning, Project Management, Database Building, Report Programming, Interface Development, Go-Live Support and Training.

OUR HISTORY

NOA was formed in 1992 by IS professionals with a desire to provide hospital information system and clinical professionals with an alternative to reliance on consulting firms with only general skills for technical product support when implementing systems with a clinical or patient care focus. The issues, solutions, opportunities and challenges required by clinical system implementations require specific product experience and applied knowledge in order to deliver real solutions for a customer.

To date, NOA has used our product-specific knowledge to provide services at over 50 hospitals, installing clinical systems using a best demonstrated practices approach that stresses both quality outcomes and knowledge transfer.
